LEGAL NOTICE — CONFIDENTIALITY & FORWARD-LOOKING STATEMENTS

This document is provided on a strictly confidential basis for evaluation purposes by qualified investors and invited early adopters of NexOS AI. Reproduction or disclosure to unauthorized parties is prohibited without prior written consent.

Revenue projections, valuation scenarios, and market estimates are prospective and illustrative. They do not constitute a guarantee of future results, investment recommendation, or offer to sell securities.

This document v2.0 reflects the actual, operational state of the NexOS AI platform as of June 2026. The previous version (v1.0) contained projected items; this document explicitly distinguishes what is in production from what is on the roadmap.

SECTION 00

Executive Summary — An Infrastructure Thesis

NexOS AI transforms business intention into complete commercial execution — from idea to product, from campaign to sale, from lead to remarketing — replacing market fragmentation with an integrated, auditable, AI-automated operation.

64	18+	R\$3,990	R\$9,990
Specialized AI Agents in Production	Domain Modules in Production	Solo Ticket (Lifetime Access)	Agency Ticket (White-Label)

"If every company needs to sell, grow, appear, convert, or influence — then every company needs a growth infrastructure. NexOS AI is that infrastructure."

SECTION 01

Market Context

MARKET	CURRENT SIZE	PROJECTION
Digital Advertising	US\$ 567.9B (2025)	US\$ 1.69T (2033)
MarTech	US\$ 551.9B (2025)	US\$ 2.38T (2033)
Creator Economy	—	~US\$ 480B (2027)
AI Agents (Enterprise)	~US\$ 5B (2024)	US\$ 47B (2030)
Intelligent Process Automation	US\$ 14.55B (2024)	US\$ 44.74B (2030)

Product — 64 AI Agents in Production

NexOS operates with an AI General Director (NexOS Command Agent) that orchestrates 64 specialized agents organized in 7 categories. The user does not choose agents — the system summons each agent at the correct moment in the execution pipeline.

CATEGORY	CORE FUNCTION	PROVIDER
Strategy	Strategic reasoning, positioning, timeline, financial projections	Claude Sonnet
Content	Copywriting with 3-turn critique loop, creatives, scripts, pages	GPT-4o / GPT-5
Audience	Segmentation, lead qualification, AI WhatsApp auto-responses	Claude Sonnet
Video	Scripts, storyboard, clone studio, daily video, recording direction	Gemini Flash
Analytics	Metrics, ROAS, CPL, creative fatigue, engagement, optimization	Gemini Flash
Automation	Launch sequences, automated dispatch, social auto-publishing	GPT-4o
Sales	AI reply suggestion by funnel stage, kanban, conversation history	Claude Sonnet

PRODUCTION INFRASTRUCTURE — ALSO DELIVERED

FEATURE	STATUS	DETAIL
HeyGen Avatar (talking-head video)	' Live	Full API integration — generate + async poll
ElevenLabs Voice Cloning	' Live	Voice clone API via workspace key or env
White-Label + Custom Domain	' Live	DNS TXT verify, brand/theme override, Agency gate
E2E / Audit Test Suite	' Live	14-step audit + 31-step launch sim + stress-full
Meta CAPI + TikTok Events API	' Live	Server-side events, SHA-256 PII hash
LGPD Native Compliance	' Live	Audit trail, consent timestamping, data rights

Economic Model — Updated v2.0

NexOS AI operates on a lifetime-access, one-time ticket model — no subscription, no monthly fee. Each access includes a credit balance for AI agent execution. The credit recharge marketplace is currently suspended pending model refinement; the focus is on maximizing access ticket revenue in the launch window.

PLANS — ONE-TIME TICKET, NO SUBSCRIPTION

PLAN	LAUNCH PRICE	REGULAR	CAMPAIGNS	CREDITS INCL.	KEY FEATURES
Solo	R\$ 3,990	R\$ 5,000	3	900 cr	6-digit · All 64 agents
Agency	R\$ 9,990	R\$ 14,000	10	2,000 cr	All tracks · White-label
Academy	R\$ 2,500	R\$ 3,900	—	—	Bonus included w/ NexOS AI

AI execution cost per complete launch: ~230–400 credits — versus R\$5,000–R\$30,000 with a traditional agency. 97%+ operational cost reduction for the customer. Margin for NexOS: ~1.5x on underlying AI provider cost.

Revenue Projection — 1 Million Customers

Current model: acquisition revenue only. The credit recharge model will be reintroduced as a second revenue layer once the access phase closes.

R\$3.99B Acquisition Revenue — 1M Solo × R\$3,990	R\$997B Blended with 10% Agency Mix (R\$9,990)	~R\$4.4B Estimated Blended Acquisition Revenue — Year 1
---	--	---

Second revenue layer (credit recharges) is architected and ready in the platform — suspended in the current launch phase. When reintroduced at modest R\$500/year/customer average, adds R\$500M ARR at 1M customers.

Valuation Framework

Valuation basis: blended acquisition revenue. Infrastructure multiples apply because NexOS is not an application — it is the layer that enables execution for any business category.

SCENARIO	REVENUE BASE	IMPLIED VALUATION
Conservative (5x acquisition rev)	R\$ 4.4B	R\$ 22B
AI-Native Platform (15x)	R\$ 4.4B	R\$ 66B
Infrastructure Category (50x)	R\$ 4.4B	R\$ 220B
50M Global Customers (blended)	US\$ ~44B	US\$ 660B–2.2T
100M Global Customers (blended)	US\$ ~88B	US\$ 1.3T–6T

Strategic Moat — 6 Defensive Pillars

1 — Data Moat

Each campaign generates proprietary data: winning creatives, audiences, objections, timing, CPL, CPA, ROAS. No competitor will have this Brazilian launch dataset.

2 — Execution Moat

Tools generate assets. NexOS executes. Execution creates dependency. Campaign history, audiences, sequences, and data remain on the platform.

3 — Workflow Moat

The more the customer uses NexOS, the more the system understands their brand, audience, offer, and history — impossible to replicate in a new tool.

4 — Proof Moat

The documented self-launch becomes the central case. Self-Proof Engine in production. The platform sells itself with its own technology.

5 — Category Moat

NexOS creates the category Growth Execution Infrastructure. Category creators tend to capture market leadership perception and revenue leadership.

6 — Compliance Moat ' & NEW

Native LGPD, Meta CAPI server-side, audit trail by design. Compliance is architectural — reducing regulatory risk for the customer and the platform.

Investor Conclusion

NexOS AI is an infrastructure thesis. Not a tool thesis. The question is not how much is a marketing tool worth. The right question is: how much is the infrastructure that makes business growth executable, auditable, scalable, and accessible to any person or company worth? The answer: it is worth the size of the economic layer it comes to control. And that layer is global.
